Experience

Freelance Front-End Web Developer and Graphic Designer

September 2020 - Present

Web Developer at Ingenium.Marketing

January 2019 - July 2020 // Barcelona, Spain

Became the Graphic Designer for Wefeel Events, in charge of events like TriTour, La Pota Roja, Run Festival Tossa de Mar, Night Trail Lloret de Mar, Gran Fondo La Falla and more, designing their logos and all other graphic products required for these events.

I was responsible of creating and managing online marketing campaigns using Google Analytics and Google AdSense, as well as focusing on SEO Web optimization for existing and new sites. Also in charge of social media for multiple businesses, managing Facebook and Instagram pages and the design of email newsletters.

Heavily involved in the creation and management of multiple websites using WordPress, HTML5, CSS, JavaScript, JQuery, Bootstrap and Shopify for over 30 different clients.

Graphic Designer at EuroBackOffice

June 2018 - December 2018 // Barcelona, Spain

Started working as a part-time Graphic Designer for Ingenium.Marketing and continued with previous responsibilities I had during the internship.

Also started managing WordPress sites, and was in charge of maintaining and designing existing and new websites for businesses around the area using this platform.
During this time I set out to learn PHP as well as tools like Shopify and Bootstrap.

Internship as Graphic Designer at EuroBackOffice

March 2018 - June 2018 // Barcelona, Spain

Internship as a Graphic Designer, focusing on the design of corporate presentations for MedySIF and its subsidiaries (Siffeed, Arkivy, MDO, etc.). Also in charge of creating brochures and other documents that required formatting and design.

During this period I started learning web development with WordPress and was hired as a part-time employee for another six months to a position where my responsibilities increased.

Internship as Printing Assistant at Gràfiques Mas Almirall

September 2017 - December 2017 // Barcelona, Spain

Learned digital and plotter printing, as well as post-printing finishes like laminating, cutting and other tasks like wire-o binding, spiral binding and textile printing.

Other responsibilities included sales, customer support and stock management inside the establishment.

Personal Projects

Classic GTA Sites & The Warriors Game Site

2020 // HTML5, CSS & JavaScript

classicgtasites.com
thewarriorsgame.com

Recreated all six Grand Theft Auto Flash websites from 2001 to 2008 and The Warriors Flash website from 2005 using HTML5, CSS and JavaScript.

This is a project to preserve some of the classic Rockstar Games Flash websites following Adobe Flash end-of-life in late 2020.
